C. L. Tien, *Berkeley, California*
K. E. Torrance, *Ithaca, New York*
O. C. Zienkiewicz, *Swansea, UK*

AIMS AND SCOPE: *Numerical Heat Transfer* seeks to provide a forum for papers dealing with the methodology and with the results of numerical solutions of problems in heat and mass transfer and in related fluid flows. The methodology papers should describe new or improved formulations of numerical schemes and/or innovative solution techniques. Papers concerned with inputs to the numerical treatment of heat/mass/fluid flow problems, for instance, mathematical modeling of complex physical processes, are also within the scope of the journal. The journal will also publish papers that present results of numerical solutions of heat/mass/fluid flow problems. These results should convey new findings for problems relevant either to basic research or to applications.

EDITORIAL AND BUSINESS STAFF: Barbara A. Bodling, *Editor-in-Chief;* Elizabeth D'Costa, *Subscriptions Manager.*

SUBSCRIPTION RATES (Eight issues per year in two volumes): Institutions—North America $389.00 per year, elsewhere $407.00 per year. In order to facilitate the availability of this journal to individuals at a reduced rate, those persons whose affiliated library has subscribed may order a subscription at the special discount rate of $79.50 per year ($97.50 outside North America). To qualify for this discount, the individual's institutional library must be identified on the order card. The special reduced rate is available to individuals not affiliated with an institution, but a statement to this effect must appear on the order card. Individual subscriptions must be accompanied by a personal check or money order.

SUBSCRIPTION SERVICE: Shipments will be made only upon receipt of payment. All orders and communications related to subscriptions (outside of Japan), including notifications of change of address, should be sent to Subscriptions Department, Hemisphere Publishing Corp., 79 Madison Ave., New York, NY 10016; phone (212) 725-0772. In Japan, please contact Mr. Yukio Suzuki, Chairman, Woodbell Scope, Inc., Mansui Bldg., 9-18, Kanda-Surugadai 2-Chome, Chiyoda-Ku, Tokyo, 101 Japan. Change of address notices should provide the old as well as the new address, including zip code number. Changes will become effective within approximately 20 days. Missing copies will be replaced only if valid claims are received within 90 days from date of mailing. Replacements will not be allowed if the subscriber fails to notify the publisher of a change of address or if a copy is misplaced at destination. Request for refund will be honored only prior to delivery of issue number 1 of each volume.

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by Hemisphere Publishing Corporation for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $2.75 per copy plus .00 per year is paid directly to CCC, 27 Congress St., Salem, MA 01970. 0149-5720/87 $2.75 + .00

NUMERICAL HEAT TRANSFER: An International Journal of Computation and Methodology (ISSN 0149-5720) is published monthly (except May, Aug., Nov., and Feb.) in two volumes for $389.00 per year (libraries and institutions) or $79.50 per year (individuals) by Hemisphere Publishing Corporation, 1010 Vermont Ave., N.W., Washington, DC 20005. Second-class postage paid at Washington, DC and additional mailing offices. POSTMASTER: Send address changes to NUMERICAL HEAT TRANSFER, Hemisphere Publishing Corporation, 79 Madison Ave., New York, NY 10016.

Numerical Heat Transfer, Volume 11, Number 4, April 1987

CONTENTS OF VOLUME 11

NUMBER 1

1 A Literature Survey on Numerical Heat Transfer (1984–1985) **Tien-Mo Shih**

31 Modeling of Three-Dimensional Natural Convection with a Time-Split Finite-Element Technique **D. W. Pepper**
(A set of computer-generated stereographic color slides that show fluid circulation due to natural convection within a 3-D enclosure are included in the back of this publication.)

57 Modeling and Calculation of Turbulent Transport in Free-Shear Flows **S. Biringen and K. Abdol-Hamid**

77 Natural Convection Heat Transfer in a Vertical Air Slot Partitioned by Corrugated Plates **Hiroshi Nakamura, Yutaka Asako, and Hiromitsu Aoki**

95 Spline Method of Fractional Steps in Numerical Model of Unsteady Natural Convection Flow at High Rayleigh Number **Wang Pu**

109 Simulation of Wedge-Shaped Product Dehydration Using Mixtures of Superheated Steam and Air in Laminar Flow **Chung-Hsing Wu, Denny C. Davis, Jacob N. Chung, and Louis C. Chow**

NUMBER 2

125 Cells-in-Series Method for Simulation of Heat Regenerators in Periodic Operation **S. Lai, M. P. Duduković, and P. A. Ramachandran**

143 Numerical Study of Convection-Diffusion-Reaction Equations for Large Damkohler and Cell Reynolds Numbers **S. K. Aggarwal**

165 Effects of Internal Heat Generation and Variable Viscosity on Marangoni Convection **T. T. Lam and Y. Bayazitoglu**

183 Natural Convection in a Stratified Fluid between Confocal Horizontal Elliptical Cylinders **W. C. Schreiber and S. N. Singh**

199 Natural Convection from a Uniform Heat Flux Horizontal Cylinder at Moderate Rayleigh Numbers **Zafar H. Qureshi and R. Ahmad**

213 Evaluation of Mean Heat Transfer Coefficient in Periodically Corrugated Channels **M. M. Maubourguet-Pellerin and F. Pellerin**

229 Numerical Simulation of Mixing Processes in Two-Dimensional Channel Flows **M. Straka and R. Edwards**

239 Boundary Integral Equation Analysis of Three-Dimensional Transient Heat Conduction in Composite Media **A. Muzzio and G. Solaini**

249 Announcements

NUMBER 3

251 Efficient Semi-Implicit Solving Algorithm for Nine-Diagonal Coefficient Matrix **Milovan Peric**

281 An Assessment of Numerical Software for Solving Two-Point Boundary-Value Problems Arising in Heat Transfer **Graeme Fairweather and M. Vedha-Nayagam**

295 Inertia Effects on Natural Convection in a Vertical Porous Cavity **V. Prasad and A. Tuntomo**

321 Combined Conduction and Radiation in a Two-Layer Planar Medium with Flux Boundary Condition **C.-H. Ho and M. N. Özişik**

341 Approximation of Slow-Moving Interface Phase Change Problems Using a Generalized Fourier Series and the Complex Variable Boundary Element Method **T. V. Hromadka II**

353 A Note on Some Finite-Difference Methods for Heat Conduction with Phase Change **Q. T. Pham**

361 Announcement

NUMBER 4

363 Control Volume Finite-Element Method for Heat Transfer and Fluid Flow Using Colocated Variables—1. Computational Procedure
G. E. Schneider and M. J. Raw

391 Control Volume Finite-Element Method for Heat Transfer and Fluid Flow Using Colocated Variables—2. Application and Validation
G. E. Schneider and M. J. Raw

401 Examination of the Upwind (Donor-Cell) Formulation in Control Volume Finite-Element Methods for Fluid Flow and Heat Transfer
C. Prakash

417 Study of Pressure Correction Methods with Multigrid for Viscous Flow Calculations in Nonorthogonal Curvilinear Coordinates
M. E. Braaten and W. Shyy

443 Hybrid Transfinite Element Methodology for Nonlinear Transient Thermal Problems
Kumar K. Tamma and Sudhir B. Railkar

461 Numerical and Experimental Studies of Turbulent Heat Transfer in a Tube
E. M. Sparrow and M. M. Ohadi

477 A Study of the Heat Transfer during Arc Welding with Applications to Pure Metals or Alloys and Low or High Boiling Temperature Materials
M. Choi, R. Greif, and M. Salcudean

TECHNICAL NOTES

491 The Transportive Property and Convective Numerical Stability of the Steady-State Convection-Diffusion Finite-Difference Equation
W. Q. Tao and E. M. Sparrow

499 Note on the Computation of the Similarity Solutions for the Two-Dimensional Buoyant Plume
Roland Hunt and Graham Wilks

505 A Test for Accuracy of Numerical Solutions of Steady-State Heat Transfer Problems
R. J. Whitley and T. V. Hromadka II
